Energy Policy Institute
Graduate Assistantships – Join our Team

Due Date: March 27, 2019

The Energy Policy Institute is interested in hiring Graduate Assistants, starting this semester, summer 2019, fall 2019, and/or spring 2020.

EPI Overview
The Institute and its team focus on policy-relevant work tied to energy decision-making and systems change across all sectors. Among our activities, the annual Energy Policy Research Conference is a flagship event. This year’s meeting will be in Boise 9/29-10/1/19 with emphasis on: “Energy Decision-making in Times of Disruptive Change.”

Applicants
We’re interested in applicants with a strong interest in energy, demonstrated ability to collect and analyze academic and/or industry information, and flexibility as a team player in an advancing Institute. Solid research experience, GIS/technical/writing skills, or work with event sponsors is a plus. We encourage applicants from all graduate programs and disciplines to apply, including: the School of Public Service, Engineering and Computer Science, Business and Economics, Innovation and Design, and the Colleges of Arts and Sciences.

EPI’s Graduate Assistants (GAs) receive a competitive stipend/hourly pay, tuition (in or out-of-state) and student fees for the given semester. Renewal for subsequent semesters is contingent upon business need and satisfactory performance. In return, the appointment requires a 20-hour per week commitment for research activities at EPI during the school year. Graduate Assistants must be admitted to the Boise State University Graduate College and also be fully admitted to their degree program, carrying at least 9 graduate credit hours during a GA-relevant semester of the school year.

Please send your 1) cover letter, 2) resume, 3) writing sample, and 4) recent transcript (unofficial acceptable) by email to kathleenaraujo@boisestate.edu by Wednesday, March 28, 2019. One PDF including all four documents is preferred. Review begins immediately.

The cover letter should cover the following:
- What graduate program you are in and when you expect to graduate,
- Your research experience,
- Your interest and/or experience in energy,
- Whether you are available to assist with our conference 9/29-10/1/2019,
- Your student ID number, and
- Why you are interested in working at EPI.
