WINTER OUTDOOR ENVIRONMENTAL EDUCATION INTERNSHIP

Are you passionate about nature and outdoor experiences? Do you enjoy sharing your knowledge with others? If so, the Bogus Basin SnowSchool program needs your help!

WHAT IS BOGUS BASIN SNOWSCHOOL?

Bogus Basin is the flagship site of the nationally run SnowSchool winter education program. Now in its 18th year, Bogus Basin's SnowSchool fieldtrip program aims to get students outside to learn about snow science and winter ecology in the Boise National Forest. With snowshoes on their feet and the guidance of trained volunteers, students are able to spend an entire day exploring the natural winter environment in a way that directly complements classroom science curriculum.

SNOWSCHOOL INTERNSHIP

- Receive academic credit for teaching local 3rd-12th grade students about snow science and winter ecology while outdoors in the winter environment
- Promote a healthy and active lifestyle through snowshoeing and hiking
- Academic internship credit available with 45+ hour commitment

WINTER 2022-2023 INTERNSHIP SCHEDULE

- Training: December 14th, 15th, 16th and January 7th (must attend at least one)
- Igloo Building: January 8th (optional)
- Teaching days: Weekdays January through early April typically 8:30am-3:30pm (interns arrange their schedule individually with supervisor)

INTERNSHIP BENEFITS

- Transportation to and from the mountain provided
- Receive professional environmental education training and gain hands-on experience teaching students science in an outdoor setting
- Learn marketable leadership skills
- Gain valuable references for your resume and network with local community organizations
- Interns are eligible to receive a complimentary Season Pass
