Tactic Development
Moving to our next phase: developing tactics

We need to base our tactics/actions on the most crucial problems we want to solve and the most important opportunities we can seize: it’s what we plan to do.

Tactics should be:

- Active (phrase by starting with a verb)
- Specific
- Concise
- Measurable (this leads to our creation of metrics)

May align to one of these functions:

**Solving problems:** prevention, intervention, disruption, restoration, remediation

**Seizing opportunities:** adaptation, promotion, enhancement, expansion, creation, transformation
Tactic

Examples

- Take a challenge or opportunity
  - Create opportunities for student leadership in COAS

- Rework as a tactic
  - Create a student advisory board for each evolving or developed COAS school

- Connect to a university goal and strategy
  - Goal 4, Strategy 1:
    - Foster Thriving Community/Advance a learning and working environment dedicated to the flourishing, sense of belonging, and freedom of expression among all students, faculty, staff, alumni, and friends of the university.
● Take a challenge or opportunity
  ○ Ex: Create opportunities for student leadership in COAS

● Rework as a tactic
  ○ Expand Bronco Gap Year’s peer mentoring program

● Connect to a university goal and strategy
  ○ Goal 1, Strategy 4
    ■ Improve Educational Access and Student Success/
       Cultivate a Commitment to high-quality, new and
       innovative learning experiences in all courses,
       curricula and co-curricula
