The CAES Energy Policy Institute is hiring Graduate Research Assistants for Summer and Fall 2022, with an opportunity for renewal into Spring 2023.

Review begins March 28

The CAES Energy Policy Institute is a non-partisan and evidence-based research and advising center that specializes in bridging engineering and economic understanding of energy systems with applied, social and technical analysis. Among our activities, we host Power Talks and the Energy Policy Conference. Student researchers are sought to support a range of research projects, such as ones on carbon policies, energy infrastructure resilience, energy hubs and jobs, energy-water systems, emerging markets, wildfires and the grid, etc.

Applicants
We’re seeking applicants with a strong interest in energy and sustainability, demonstrated ability to collect and analyze academic and/or industry information, and flexibility as a team player. Students with strengths in qualitative, quantitative and/or geospatial methods, and an interest in doing mixed methods research are invited to apply. Solid research experience in GIS/technical/writing skills are a plus. We encourage applicants from all graduate programs and disciplines to apply, including: the School of Public Service, Engineering and Computer Science, Business and Economics, Innovation and Design, and the Colleges of Arts and Sciences, or Health.

The EPI Graduate Research Assistantship - benefits package provides a competitive stipend, tuition, health insurance, and student fees for the summer, fall or spring semester. In return, the appointment requires a 20-hour per week commitment for research activities during the given semester. Students holding this position must be admitted to the Boise State University Graduate College and also be fully admitted to their degree program for Fall 2022, carrying at least 5 graduate credit hours during the Fall semester of the school year (international students must carry 9 credits).

The EPI Graduate Research Assistantship – hourly position provides a competitive hourly rate of $15 to $20 per hour. Students work an agreed upon set of hours for research activities with EPI during the summer or school semester. These team members must be admitted to the Boise State University Graduate College and also be fully admitted to their degree program.

For both positions, renewal for the next semester (Fall 2022 or Spring 2023) is contingent upon budget and satisfactory performance.

Please email the following to the contact listed below. One PDF including all four documents is preferred.
1) cover letter
2) resume
3) writing sample
4) recent transcript (unofficial acceptable)

The cover letter should include:

- Whether you are applying for an hourly position or a graduate assistantship package,
- What graduate program you are in and when you expect to graduate,
- Your research experience, plus interest and/or experience in energy and/or sustainability,
- Why you are interested in working at EPI,
- If you plan to work in another position at the same time on campus or elsewhere,
- Are you interested in Summer, Fall or both?
