**MSGC Program Admissions In-Progress Course Policy**

*Prerequisite coursework* includes, but is not limited to, the following courses:

- Biochemistry (1 semester) not combined with another chemistry or biology with a grade of “B-” or better [CHEM 350](#) or equivalent

- Genetics (1 semester) completed within the last 5 years with a grade of “B-” or better [BIO 310](#) or equivalent

For applicants who are currently enrolled in either of the above courses during the SAME semester as the application cycle, they must comply with all of the following stipulations to be considered for review:

1. **All** application materials and fees, except in-progress course grades, MUST be received by December 15 11:59 PM MST. This includes ensuring that the Graduate College has received all official transcripts. The program is not responsible for verifying receipt of official transcripts.

2. Official ‘Work-In-Progress’ transcripts must be submitted to the Graduate College, and the program must be notified of **any** in-progress courses at the time of application. This notification should be sent to geneticcounselingms@boisestate.edu.

3. In-progress courses must be completed in time for official course grades to be submitted to the program by December 30 11:59 PM MST. Updated transcripts must be submitted to the Graduate College. Documentation verifying grades should also be sent to geneticcounselingms@boisestate.edu.

4. A grade of “B-” or better must be achieved in both courses.

**If the course grades are not received by the due date, the application will be considered incomplete and not reviewed in the current cycle.** Fees are nonrefundable. These deadlines are necessary because the Admission Committee is tasked with reviewing many applications, and all applicants deserve a fair review period.
